Subject: Rapid Alignment Device for Microstereoscope

25X1 Attention:

Gentlemen:

25X1 In response to the subject Request for Proposal, is pleased to present for your consideration and evaluation our Technical Proposal No. WDP-232 (submitted under separate cover) and associated cost quotation for a Rapid Alignment Device for Microstereoscope.

25X1 proposed an optional adaptor for rapid alignment during the fall of 1966. However, this device was designed to interface with the proposed Anamorphic Eyepiece Adaptor having parallel barrels. The subject request requires that a Rapid Alignment Device be compatible with existing Microstereoscopes which have non-parallel eyepieces that are variable dependent upon the operator's comfort. However after an extensive effort, the design depicted in our proposal will allow the Rapid Alignment Device to properly interface with the existing Microstereoscopes.

Delivery Schedule

1. Installation and Maintenance Drawings will be supplied concurrent with the Device in accordance with Standard Commercial Drawing Practice.
2. A Formal Acceptance Test Criteria document will be provided forty-five (45) days prior to delivery. Thirty (30) days will be allowed for approval and/or comment.
3. Final Formal Acceptance Testing and Acceptance is to be at and will be no more than two (2) days in length of time. Installation is to be performed by the customer.

Declass Review by NGA.

- 25X1
4. The [] price and technical proposals are predicated upon the customer supplying a suitable Microstereoscope for use as a test bed within four (4) weeks after the date of contract.
